

# Long-Term Disability

## 2007 EMPAQ® Data Integrity Report For

AMC Inc.  
**INFORMATION ONLY**  
NAICS Industry:

*Manufacturing*

### REPORT CONTENTS

- Verification step for data submission
- Presented in easy-to-read graphical format
- Uses benchmarks from previous years to determine if data are reasonable

**ISSUED BY:**

**University of Michigan  
Health Management Research Center for  
EMPAQ® and the National Business Group on Health**

### LONG TERM DISABILITY

Company **AMC Inc.**  
EMPAQ® Program Year **2007**

Metric Description	Numerator Denominator	Calculation	EMPAQ® Reference Ranges*
<b>Annual Claim Incidence</b>	# New LTD Claims	= $\frac{200}{25,600} \times 1000$	 7.8 Low      Median      High 2.6      4.2      6.7
	Average # LTD Covered Employees		
<b>Cost per Claim</b>	Total LTD Payments	= $\frac{\$15,264,400}{4,200}$	 \$3,634 Low      Median      High \$5,487      \$8,190      \$11,977
	# of Active LTD Claims		

\* The EMPAQ® Reference Ranges were calculated from the benchmarked data found in the 2007 Phase II report. In the bar graphs, the Low, Median and High Comparison points correspond to the percentiles (25%, median, and 75%, respectively) from the 2007 benchmarks. These metric reference ranges are included to aid a certified EMPAQ® data submitter in evaluating the reasonableness of their data submission.

The data submitter should take note if any of their calculated metrics fall outside the recommended ranges. In the event that the calculated metric is not within range, the data submitter should double-check the accuracy of the data and the submission. Corrections can then be made through the data submission tool before the EMPAQ® benchmark comparison reports are generated.
